

INSECTICIDES

CYPERFUM®

HYDRO REACTION SMOKE GENERATOR

TARGET:

- CRAWLING INSECTS
- FLYING INSECTS

Composition	
Cypermethrin 40/60 40/60	8,0 %
Chrysanthemum cinerariifolium Extr. 50%	0,02 %

CHARACTERISTICS:

CYPERFUM is a smoke generator which produces microparticles of insecticide through a hydro-reactive carrier.

The produced smoke is able to penetrate cracks and crevices being effective against cockroaches (*Blattella germanica*) and *Plodia interpunctella*.

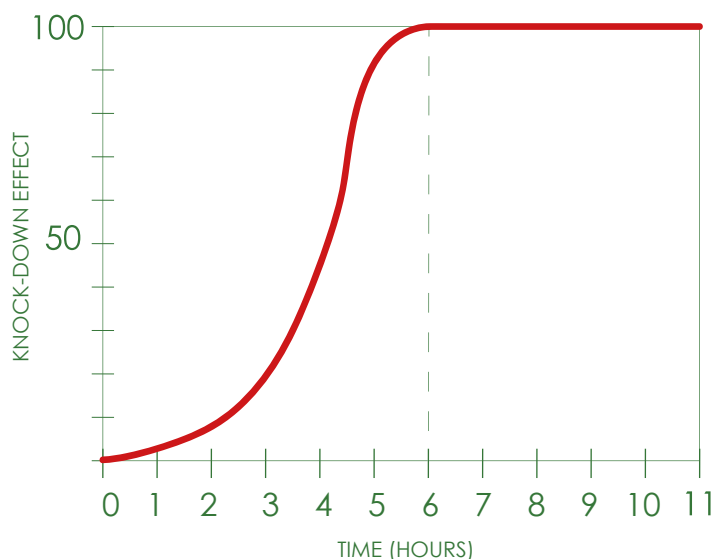

The absence of firing makes CYPERFUM use safe both in civil and industrial environments like houses, hotels, trains, warehouses, raw materials stocks, silos, basements, containers, vans, bus and means of transport in general etc.

CYPERFUM doesn't leave any stain or dust residues on furniture or objects present into the room.

It doesn't contain any propellant.

Easy to use.

It doesn't require a wick or a flame.

INSECTICIDES

CYPERFUM®

Volumes		
Can	flying insects	crawling insects
20 g	250-340 m ³	110-140 m ³
