### Fat and oil eliminator for drain pipes

#### CHARACTERISTICS

- Appearance: Green liquid
- Odour: Perfumed
- pH: 7.5 ± 1.0
- Bacterial count: 1 billion microorganisms per litre

Kitchen wastewater has a high level of fats from dishwashing and food preparation, among other processes. These plant and animal fats accumulate over time in the pipes and in the fat separators, causing a series of problems, such as:

- Infestation from *Drosophila* sp. and *Clogmia* sp. (organic residuals in drains pipe represent a perfect breeding sites for this kind of gnats)
- Blockages in pipes due to loss of span.
- Fast silting up of the fat separator, with a risk of overflow.
- Release of bad smells from these facilities.

**Enzuma** is a strong biotechnology formula designed to solve these kinds of problems. It is comprised of natural microorganisms that are strictly non-pathogenic, surfactant compounds and plant origin complexes. Due to the specific combination of its components, **Enzuma** acts fast emulsifying and breaking down fats accumulated in treated systems.

#### ADVANTAGES

- Action to remove fat deposits.
- Product with no chlorinated solvents, alkaline or acid products.
- Strictly non-corrosive, neutral product.
- Non-toxic.
- Totally biodegradable.
- Strengthens depurative bacterial flora from the natural environment.

**Enzuma** is formulated with strictly non-pathogenic microorganisms, according to European Directive 2000/54/EC.

#### DOSAGE AND INSTRUCTIONS FOR USE

**Pipes:** apply between 100 and 400 ml of product twice a week, depending on the diameter of the pipe, until the problem is resolved. Apply the product directly in affected drains and run the water.

**Fat separators:** use 250 ml for every 200 litres of capacity. Apply at a point near the separator or directly on the surface of fats. Repeat application until the problems have disappeared. Once the problems have been solved, continue the usage one a month for the maintenance of the facilities.

Always apply the product at night, after cleaning operations, so that it can act for as long as possible.

**SAFETY** See product safety information sheet.

#### Technical data

Format	1 L bottle
Packaging	12 pcs
<b>Code</b>	<b>069</b>
