

INSECTS TRAPS

FRUIT FLY ATTRACTANT®

Attractant for *Drosophila* spp.

CHARACTERISTICS

Liquid attractant for *Drosophila* spp. ready to use inside monitoring and capture devices for Fruit fly.

The ingredients used minimize the capture of non-target species.

It can be used indoor and outdoor.

HOW TO USE

Use the liquid attractant within the appropriate multiple capture traps (cod. 564), both for monitoring activities and for mass trapping.

Check the traps weekly and replace the liquid every 10-15 days.

It's a natural complementary solution for an integrated pest management with our **Enzyma**® liquid (cod. 069).

NOTE

For correct use, follow the instructions on the label.
