

BAIT STATIONS

FUSION BOX LP®

Multifunctional Rat bait station

CHARACTERISTICS

Fusion Box is a multipurpose tamper proof bait station suited for both civil and food industry uses.

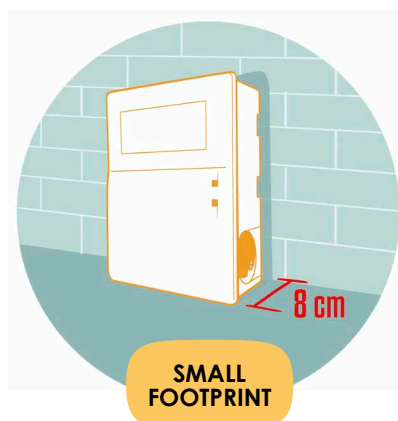

This version with a low-profile lid, is used primarily in combination with rodenticide bait and can be placed vertically to reduce the occupied space, or horizontally, like a classic rodent bait station. The low profile allows it to be placed easily under a pallet.

An additional function is the option to install a glueboard for monitoring insects (could be installed together with snap traps or rodenticide bait).

Removing the manger allows use of glue for monitoring mice and rats (glueboard code 129 or glue tray 141-TB).

TECHNICAL FEATURES:

- manufactured in tamper-proof polypropylene with anti-UV treatment to resist against atmospheric agents;
- lockable with safety key;
- stainless steel support for wax blocks and fresh bait;
- removable tray for easy cleaning and maintenance;
- simultaneous monitoring of insects and rodents;
- compatible with two interchangeable lids.

BAIT STATIONS
