

INSECTS TRAPS

MASTERTRAP COCKROACHES®

Trap for

CHARACTERISTICS

Mastertrap Cockroaches, is a modern and ecological system for capturing all types of crawling insects, especially cockroaches, without the use of toxic substances.

The product is made up of cardboard covered by a layer of glue. A gel pheromone strip is embodied in the glue layer thus improving the attractiveness of the trap towards insects.

Mode of use

CRAWLING INSECTS

MODES AND METHODS OF USE

Mastertrap Cockroaches is a trap that is widely used in the food industries, houses, kitchens, restaurants, warehouses and in all those food manufacturing facilities where space-saving and ease of use is needed.

Mastertrap Cockroaches should be placed under the shelves, next to coffee makers machines, under co-opts and sinks, near dishwashers, refrigerators... Spread the traps in different places, in order to increase chances of catching.

When the trap is full replace it with a new one.

To assembly the trap, refer to the instructions given with the product.

NOTES:

For a correct use of the product, carefully read the instructions on the product.
