## PERMEPLUS®

**CONCENTRATED INSECTICIDE FORMULATION  
IN AQUEOUS MICROEMULSION  
FOR DOMESTIC AND CIVIL USE**

**Registration Ministry of Health N.19904**

### Composition: 100 gr of product contain

Permethrin	15,2 %
Tetramethrin	2,5 %
Piperonyl Butoxide	5,2 %

### CHARACTERISTICS:

PERME PLUS is a concentrated insecticide formulation in aqueous microemulsion, based on Permethrin and Tetramethrin. Perme plus is completely odourless.

The association of these active ingredients gives the product a good flushing-out effect as well as a high knock-down and residual action.

Perme Plus acts by direct contact and ingestion, rapidly determining irreversible alterations to the nervous system of the target insects.

The Pyperonil Butoxid, with its synergic action, protects the active ingredients from enzymatic degradation and helps them penetrating within the cutaneous stigmas of the target insects.

PERME PLUS is concerned to fight a wide range of flying and crawling insects, such as flies, moths, phlebotoma, mosquitoes, tiger mosquitoes, chironomids (non-biting midges), wasps, cockroaches, ants, fleas, bed-bugs, woodworms and ticks, which infest such places like stables, livestock, animal farms, kennels, riding stables, facilities with civil, industrial or agricultural functions, warehouses, public buildings, garbage depots, waste disposal plants, waste treatment plants. The product is also recommended for the treatment of public and private urban green areas, for the control of mosquitoes and for treatments against bed bugs.

### USAGE AND DOSAGE:

Perme Plus can be spread with hand sprayers, pressurized pumps, spears, cannon air sprayers or thermal foggers, depending on the kind of surface to be treated.

While treating green areas it is advisable to perform a uniform watering of the vegetation avoiding dripping.

Perme Plus should be diluted in water at the following dosages:

Dilution	on vegetation outdoors		
with medium range sprayers	40-80 ml in 10 Lt of water	0,4 - 0,8 %	the concentration can be increased without exceeding the limit of 2 %
with thermal foggers (professional use)	100 ml in 1 Lt of Propylen glycol	10 %	Obtained solution = 3.500 m <sup>3</sup>
