

RODENTICIDES

RAT TAP®

Flavoured attractant for rodents

CHARACTERISTICS:

Practicle synthetic bait to attract mice and rats without use of food substances, thus avoiding contamination mediated by allergens or secondary infestations caused by cockroaches, ants or beetles typical of food.

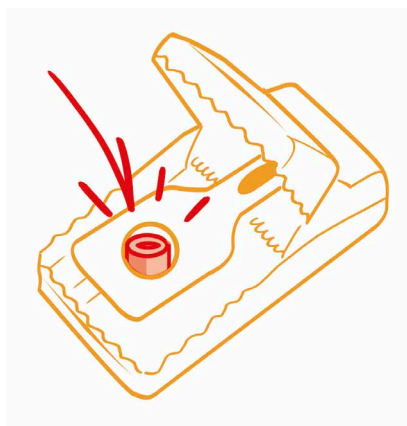

RAT TAP is non-toxic and allergen-free.

The plastic material allows you to quickly identify any signs of browning.

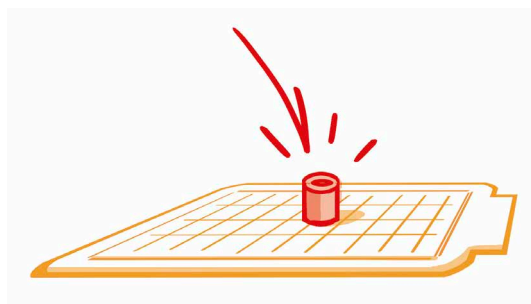

METHOD OF USE:

The **RAT TAP** is designed to work inside snap traps for 145-TR and 145-RA rats.

Alternatively, it is possible to position the attractant on the glue plates to increase its catch rates.

for use on snap traps

for use on glueboards
