

INSECTICIDES

CIPEPLUS®

CONCENTRATED LIQUID INSECTICIDE

TECHNICAL PROFILE

Surgical Medical Device. Registration of the Ministry of Health No. 18414

Composition: 100 gr of product contain

Cypermethrin	10 %
--------------	------

CHARACTERISTICS:

CIPEPLUS is a concentrated emulsifiable liquid insecticide with a high content of Cypermethrin.

It is indicated in the fight against flying insects such as flies, mosquitoes, mosquitoes tiger and crawling insects such as: cockroaches, ants, etc.

Due to its highly killing, flushing and residual action it is indicated for the disinfestation of buildings with civil, industrial, livestock use, urban agglomerations, suburban areas, homes, schools and kindergartens, barracks, gyms, theaters, cinemas, waiting rooms at stations and airports, tourist villages, food companies, campsites, canteens, restaurants, nursing homes, rest homes, warehouses and warehouses for food goods, animal shelters, warehouses and premises for the production and stowage of cigarettes and tobacco, industrial environments in general, port areas and equipment, hotels, communities, hospitals, cohabitations, means of transport (excluding airplanes), industries, waste collection bins, etc.

CIPEPLUS can also be used in green areas such as gardens, lawns, ornamental bushes, hedges, avenues trees and public and private green areas. CIPEPLUS is an odorless and flammable product as it contains solvents. CIPEPLUS acts immediately and remains active for several weeks. The duration of action of the insecticide depends on atmospheric conditions, on the composition of the surface to be treated (less active on porous surfaces).

METHOD OF USE:

CIPEPLUS is a concentrated insecticide therefore its use can only take place after dilution in water. The solution, obtained on the basis of the dilution percentages, must be sprayed on the surfaces to be treated e in places where insects can hide (pipes, cracks).

DOSAGE:

The insecticide solution can be distributed with hand sprayers, pumps a prestressing, shoulder pumps, thermonebulizers and ULV generators.

CIPEPLUS is used diluted with the following dosages:

DILUTION			
Mosquitoes on green areas	1 ml / liter of water	0.1%	1 liter of solution per 20 m ²
Mosquitoes	10 ml / liter of water	1,0 %	1 liter of solution per 30 m ²
Mosquitoes with nebulizers	50 ml / liter of water	5%	1 liter of solution for 2.300 m ³ or 770 m ²
Flies	10 ml / liter of water	1,0 %	1 liter of solution per 12 m ²
Crawling insects	10 ml / liter of water	1,0 %	1 liter of solution per 20 m ²
