

BAIT STATIONS

MASTERBOX MINI®

Rodent bait station

CHARACTERISTICS

Masterbox Mini is a rodenticide bait station made of sturdy plastic material that is impervious to the weathering agents.

Thanks to its security lock and fastening systems, it is an excellent system for creating particularly secure feed stations that are protected from impact and tampering.

Entry hole diameter: 25 mm

APPLICATION

Masterbox Mini is designed to create bait points protected from dust, dirt, moisture. It has a compact and non-invasive shape, it is suitable for the distribution of rat-killing bait in both paraffin-embedded blocks and fresh bait.

This trap can be used for deratization programs in accordance with integrated pest management systems and HACCP in indoor areas (where there is no food production or handling) and outdoor areas in civil, industrial (food companies) and domestic areas.

The station meets the characteristics required by the ministerial order of February 10, 2012 (requirement to use a station equipped with a security key for the administration of topical bait).
