

BAIT STATIONS

NEW MASTERBOX PLUS® Multifunctional security station

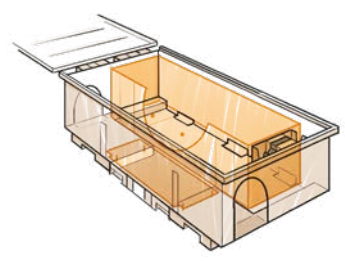

CHARACTERISTICS:

The new Masterbox Plus® is the expression of all the know-how ORMA has developed along all these years. This security station is a concentration of technical innovations which make the new Masterbox Plus a RELIABLE, FLEXIBLE and STURDY bait station.

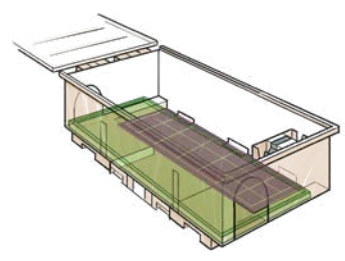

The REMOVABLE MANGER allows:

- The monitoring of crawling insects and rodents at the same time, placing a carton glue board of wide dimensions below the manger
- Quicker cleaning and routine operations
- Placement a snap trap for rats

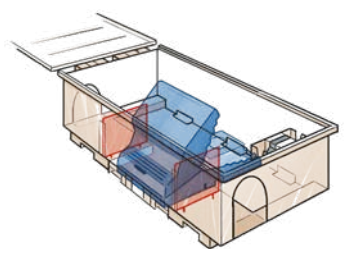

The new Masterbox Plus can be set up in 3 different modes according to the scenario the PCO is facing:

A: Rodents monitoring with baits (in fresh pasta, blocks, grains, pellet and virtual baits) + wide glue board for crawling insects monitoring.

B: Rodents monitoring with plastic or carton glue board + wide glue board for crawling insects monitoring.

C: Monitoring of murine infestations with snap traps (for mice or rats), using the removable security plastic bulkheads.

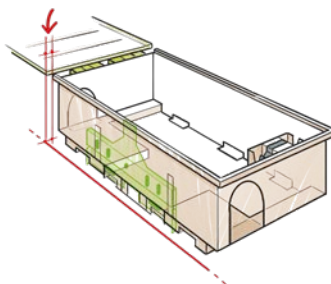

BAIT STATIONS

The new closure with metal clip increases the safety of the box already granted by the anti-tampering edges.

The closure moved on the short side reduces the distance from the wall, diminishing its foot print and giving the PCOs a clearer vision at a first glance.

ACCESSORIES INCLUDED:

- 1 plastic spacer to fix the station to poles;
- 1 quick fixing system for hanging the station to walls;
- 1 stainless steel support for horizontal bait fixing;
- 4 polypropylene vertical supports for vertical bait fixing;
- 1 plastic bridge for uses without snap traps;
- 2 vertical plastic bulkheads for snap trap mode;
- 1 removable manger;
- 1 unilock key.
