

DISPENSER

BO-09[®]

Aerosol automatic dispenser

CHARACTERISTIC

BO-09 is an automatic dispenser for aerosol (fragrances or insecticides) and can be used in any type of environment.

It must be installed at a height of about 2.5-3 meters, in a position that favors air currents to distribute the nebulized product throughout the environment.

A single BO-09 diffuser can protect rooms of 180-200 m³.

The dispenser works with batteries of the type D, which last approximately 14 months.
