

# INSECTICIDES

## CIFUM 7.2®

SMOKE GENERATOR INSECTICIDE

Registration of Ministry of Health N. 20179

Composition	
Cyphénotrine	3,0 %

### CHARACTERISTICS:

CIFUM 7.2 is a smoke-generator insecticide based on Cyphenothrin with a high knock down effect.

The produced smoke is able to penetrate cracks and crevices being effective against both crawling and flying insects.

CIFUM 7.2 doesn't stain or leave dust residues on furniture or objects present into the room.

### MODE OF USE:

Open door, cupboards and drawers inside the premises.  
Remove animals, including fish and plants from the area to be treated.

Close door and windows that open to the outside.

Lay the fumigant on a refractory base (e.g. a brick or a metal plate); never place it in a confined space (e.g. bucket).

Can	Flying and Crawling insects
30 g	90 m <sup>3</sup>
60 g	180 m <sup>3</sup>
120 g	360 m <sup>3</sup>

The product is particularly indicated for the treatment of civil and industrial environments, storage of raw materials, food industry and warehouses.

When treating large area, use the required number of fumigator and activate them in sequence, starting with the furthest from an identified exit.

Clear people from the area to be treated.

The smoke is released after some seconds.

Leave the fumigator works for at least 4 hours or, if possible, a longer length of time.
