

# RODENTS TRAPS

## MASTERTRAP RAT®

GLUEBOARD TRAP TO CATCH AND MONITOR RATS

### CHARACTERISTICS:

Mastertrap Rats is a glueboard trap against rats which can be used to monitor the infestation level of an area.

It could be used folded or not. Due to its dimensions, it fits perfectly our multicatch trap Total Box, thus allowing to create a station without rodenticide bait.

The glue is flavoured with food attractants, which improve the performance of the device dedicated to capture.

### NOTE

For correct use of the product, strictly follow the instructions on the label.

**SUITABLE FOR  
MASTERBOX PLUS**
