

INSECTICIDES

PERMEGREEN 5.5®

CONCENTRATED INSECTICIDE WITH A KNOCK DOWN
AND RESIDUAL ACTIVITY FOR DOMESTIC AND CIVIL USE

Registration Ministry of Health N.20085

Composition: 100 gr of product contain

Permethrin	5,5 %
Tetramethrin	0,8 %
Piperonyl Butoxide	3,0 %

CHARACTERISTICS:

PERMEGREEN 5.5 is a concentrated insecticide with a knock down and residual effect. It is based on permethrin and tetramethrin with strong knockdown activity and flushing effect.

PERMEGREEN 5.5 acts through contact and ingestion.

It determine a quickly and irreversible alteration of the nervous system of target insects.

The piperonyl butoxide has a synergistic action ant it can protect the active ingredients from enzymatic degradation and it facilitates its penetration through insects' stigmas skin.

APPLICATION AREA:

PERMEGREEN 5.5 can be used in the following areas: homes, basements, attics, boxes, yards, restaurants, hotels, canteens, cafes, bakeries, pasta factories, bakeries, mills, empty silos, slaughterhouses, dairies, maturing warehouses and storage meat products and cheese products, empty warehouses and stores of food substances (unless these products are not sealed or protected from possible spraying), local authorities and communities: public houses, hospitals, clinics, schools, barracks, offices, cinemas, theaters, libraries, public places, warehouses, premises used for the production of cigarettes and empty tobacco stowage, processing wool, leather, paper and textiles, wooden crates, pallets, various containers, etc.

Transport sector: transportation (subways, cars, ambulances, planes, buses, ships, railway carriages , port and airport areas).

Zootechnical areas, livestock, animal shelters, kennels, stables, etc. Boulevards, parks and gardens, suburban areas, campsites, holiday parks, etc.

The product can be effectively used for mosquito control in the treatment of green areas, public and private, such as hedges, gardens, tree-lined avenues, ornamental shrubs and lawns. It is used to combat a wide range of flying and crawling insects like flies, mosquitoes, tiger mosquitoes, sand flies, wasps, cockroaches, ants, bedbugs, fleas, ticks.

PERMEGREEN 5.5 can be distributed with electric or manual sprayers, knapsack, sprayers, spray guns, mist-blowers, nebulizers and thermal foggers depending on the need and use of the treated area. The use of this nebulizers is limited to professionals.

INSECTICIDES

PERMEGREEN 5.5®

DOSE AND USES:

PERMEGREEN 5.5 is used diluted in water at the following doses:

• **Flying insects:** (walls, floors, baseboards, blinds, etc.), dilute 150-200 ml into 10 litres of water (1,5-2%).

The prepared solution is sufficient for the treatment of a surface of 150 m².

• **Crawling insects:** indoors use: (cockroaches, ants, bedbugs) dilute 300 ml in 10 liters of water (3%).

The prepared solution is sufficient for the treatment of a surface of 200 m².

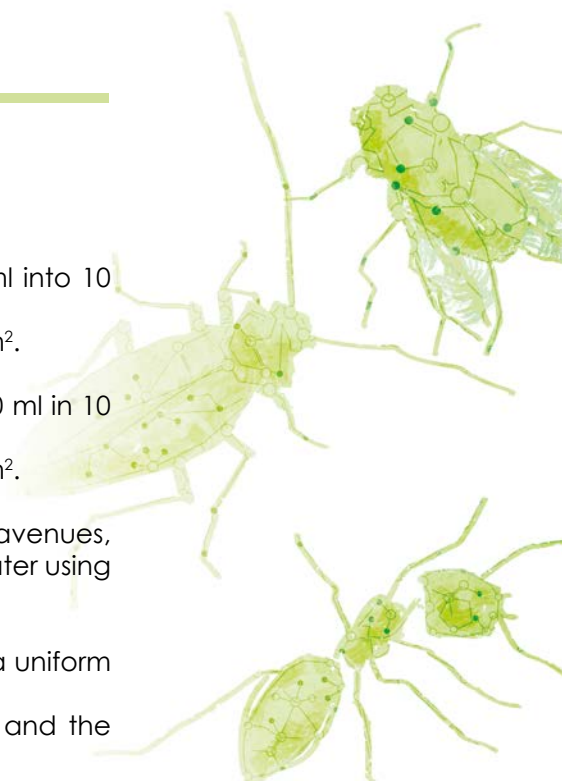

• **External use:** in the open field against mosquitoes (gardens, tree-lined avenues, hedges, bushes and ornamental turf): dilute 20 ml in 10 liters (0.2%) of water using medium-low volume sprayers, or other appropriate equipment.

Distribute 10 liters of solution in 150 m² of surface in order to guarantee a uniform wetting of the foliage but avoiding dripping.

The concentrations can be varied in relation to the equipment used and the transfer speed.

• **Thermodaze treatments (professional use):** use 100 ml of the product in 1 liter of propylene glycol or other suitable solvent. The solution obtained can be used to treat about 3500 m³.

Follow carefully the instructions and the warnings on the label. Confidential information for the gentlemen doctors, hygienists, veterinarians and parasitologists.
