

INSETTICIDES

TRANSPYR PU[®]

READY-TO-USE LIQUID INSECTICIDE BASED ON
NATURAL PYRETHRUM

TARGET:

- CRAWLING INSECTS
- FLYING INSECTS

Composition

1-R-Trans-phenothrin	0,2 %
Pyrethrum extract 50%	0,2 %

CHARACTERISTICS:

- TREADY TO USE insecticide for thermal fogging machine
- Rapid knock down action: ensured by natural pyrethrum and 1-R-trans-phenothrin.
- Suitable for FOOD INDUSTRIES: low residuality and absence of PBO make this product perfect for this sector.

TRANSPYR PU is a ready-to-use liquid insecticide based on Pyrethrum and 1-R-trans-phenothrin. It has a strong and rapid knocking down and flushing action thanks to the properties of the natural pyrethrum extract. It is suitable for non-residual treatments in civil, industrial and domestic environments. It can be used as it is or by spraying it in the environment or on surfaces to fight flying insects such as flies, and crawling insects such as small and large cockroaches (German and American cockroaches).

TRANSPYR PU can be used in the following fields:

Domestic environments: homes, cellars, attics, garages, courtyards. **Food supply chain:** restaurants, hotels, canteens, bars, bakeries, pasta factories, pastry shops, mills, empty silos, slaughterhouses, dairies, cured meats and cheeses maturing and storage warehouses, food warehouses and stores, which must be empty (unless the products are sealed or protected from possible spraying). **Public establishments:** schools, barracks, offices, cinemas, theatres, libraries, public premises in general. **Industrial sector:** warehouses, premises for the production of cigarettes and the stowage of tobacco (as long as they are empty), processing of wool, leather, paper and fabrics in general, wooden crates, pallets, various containers. **Transport sector:** means of transport (subways, cars, ambulances, buses, ships, railway carriages, port and airport areas). **Civil sector:** urban areas, campsites, tourist villages.

METHOD OF USE

Non-Professional Use: TRANSPYR PU is a ready-to-use insecticide, one liter of product is sufficient to treat porous surfaces of about 15 m² and non-porous surfaces of about 25 m².

Flying insects: To spray directly on pests, taking care to insist in every place where insects can nest.

Crawling insects: To distribute on the affected surfaces in a measure of 1 liter every 15 m² on porous surfaces and 1 liter every 25 m² on non-porous surfaces, in every place where insects can nest such as cracks, baseboards, corners, crevices, under the furniture, etc.

Professional Use: TRANSPYR PU can be used by professional operators by distributing with electric or manual sprayers, backpack pumps, lances and / or atomizers, ultra-low volume (ULV) nebulizers or thermo-nebulizers according to the needs of use and the surfaces to be treated. For treatment with professional equipment, to use 1 liter of product in an area of about 1000 m³.

USE WARNINGS

In the food industry treatments or in places where food can be prepared, make sure that there are no foodstuffs or food products, unless they are sealed or protected from possible spraying.

To keep the product in a place inaccessible to pets. If the product is used in a place where you will stay for a long time and in the bedrooms, to ventilate the room before staying there again. After handling and in case of contamination, wash thoroughly with soap and water. Do not use on animals. Do not use in agriculture. To shake well before use.

INFORMATION FOR MEDICAL PROFESSIONALS

Drug-dynamic actions: block of nerve transmission.

WARNING: CONSULT A POISON CONTROL CENTER.

Technical data

Target	Crawling and flying insects
Formulation	Ready-to-use liquid insecticide
Packaging	6 bottle
Codice	081-01
