

UV FLY TRAPS

SATURN®

UV-lamp fly trap

CHARACTERISTICS:

Saturn is the ORMA UV fly trap that attracts and captures flying insects (flies, mosquitoes, midges, moths, etc.) effectively and ecologically.

Made of painted sheet metal, Saturn mounts two 15 W T5 UV neon tubes and must be installed at a height of about 2-3 meters hanging on the wall **horizontally or vertically**.

The large surface of the glue plate makes it effective for spaces of about 100 square meters, Saturn is equipped with a magnetic closure for a rapid replacement of the plates and the lamps. Saturn complies with food hygiene regulations (HACCP).

Guarantee 2 years

APPLICATION FIELDS

Thanks to its aesthetics and technical characteristics it is ideal for installation in bars, restaurants, and in general all activities open to the public.

NOTE

For correct use of the product, scrupulously follow the instructions in the instructions for use.
