

MASTERTRAP SCARAFAGGI

CHARACTERISTICS

The glue trap Mastertrap cockroaches, is a modern and ecological system for capturing all types of crawling insects, especially cockroaches, without the use of toxic substances.

The terminal is available in two different types: one provides as attractive to cockroaches, a food tablet to apply (cod. 120) while a second provides a gel strip already positioned on the glue (cod. 120G).

USES:

The Mastertrap Cockroaches is a trap that is widely used in the food industry, in domestic dwellings, in kitchens, restaurants and all those activities that manipulate foods and that need a space-saving location and easy to use.

METHOD FOR USE:

The Mastertrap Cockroaches should be placed under the shelves, next to the coffee makers, under cooktops and sinks, near dishwashers, refrigerators. Place different locations in different places, in order to increase the chances of catching. When the trap is full, fold and throw.

For assembly of the trap, refer to the instructions on it.
