

# RETTIL RAUS

Preparation in grains used in outdoor areas as repeller for reptiles.

## CHARACTERISTICS

**Rettil Raus** creates, once applied, a particularly unpleasant olfactory barrier for reptiles in general (snakes, lizards, geckos, etc...). **Rettil Raus** is not dangerous for humans and animals and it creates no damage to the grass, plants or crops.

## APPLICATION

**Rettil Raus** can be applied in all places where there is infestation of reptiles or to prevent infestation: meadows, gardens, terraces, camping, swimming pool surrounds, stacks of wood, etc...

## MODE OF USE

Disperse a dosing cup of product (50 mg) every two m<sup>2</sup> in the places that have to be treated. Increase a bit the dosage for a more decisive action. If not washed, the product remains effective for about one week; irrigation and rain can reduce the effectiveness and duration of the product. In case, repeat the treatment. Repeat the treatment until the end of the infestation.

## COMPOSITION

Inert clay and mix of essences. The product contains camphor oil. May cause an allergic reaction.

## PACKAGING

1 Kg bottle in boxes of 9 pcs.
