Permethrin.....	0,42%
Tetramethrin.....	0,26%
Piperonyl butoxide.....	1,00%
Coformulants up to.....	100%

## CHARACTERISTICS

**Vespajet Foam** is a spray insecticide studied to fight wasps and hornets. The special valve dispenses the product up to 4-5 meters away, as soon as the spray hits the nest immediately turns into a thick, enveloping foam that does not allow insects to fly. In this way, wasps and hornets die in few seconds. Vespajet Foam can be used to treat nests usually difficult reach. Moreover the characteristics of the active ingredients (permethrin and tetramethrin) give to the product good knockdown and residual effects.

## PACKAGING

Box of 12 pcs
