

# DISPENSER

## AIR CONTROL®

### aerosol automatic dispenser

#### CHARACTERISTICS

The AIR CONTROL aerosol dispenser, with its special insecticide and deodorant aerosol sprays, automatically set off, at regular intervals of 8, 15 or 30 minutes, a special dosage valve which vaporizes a little quantity of finely micronized liquid. In this way millions of miniscule particles are scattered into the environment to form an invisible protective screen against insects and unpleasant smells.

A single AIR CONTROL dispenser will suffice to protect environments of 180-200 m<sup>3</sup>. The dispenser works with four batteries, which guarantee 12 months of continuous use.

The device is 18 cm tall, 13 cm wide, 9 cm deep and it should be installed at an height of about 2,5-3 metres.

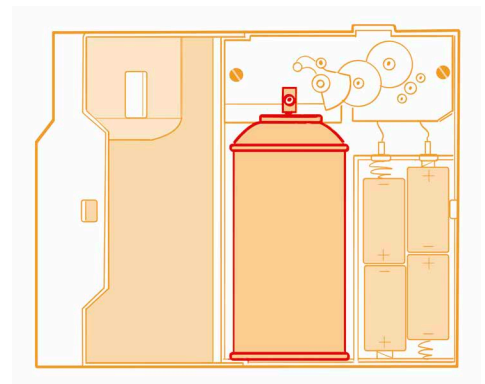

AIR CONTROL is available with photo-electric cell too.

In this way, it works only during the night, only during the day or 24 hours a day. Our insecticide aerosol sprays, with its extremely high concentration of natural pyrethrins, free environments of insects such as flies and mosquitos in only few minutes and prevent subsequents reinfestation.

The automatic AIR CONTROL dispenser is the cheapest and most effective system to fight insects and unpleasant smells.

#### TECHNICAL DATA

- 3 different spray intervals: 7,5-15-30 minutes
- Light sensor: day / night / 24H
- 4 C batteries power source
- Warranty: 2 year
- Totally Made In Italy
- Dimensions: cm 13 x 9 x 18 (h)

#### Technical data

Batteries 4 type C  
Packaging 18 pcs
