

# BAIT STATIONS

## TOTAL BOX®

### Multifunctional Rat bait station

#### CHARACTERISTICS

Total Box is a dispenser of rodenticide bait made from strong plastic material resistant to atmospheric agents. Due to its safety lock and its method of affixing, Total Box is an excellent device to create particularly safe stations and protected from shocks and tampering.

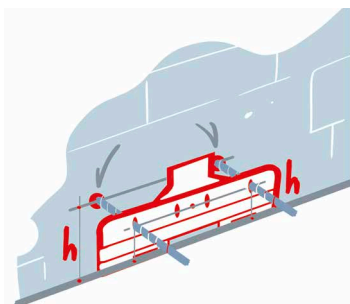

Total Box can perform the dual function:

- monitoring the crawling insects using cardboard adhesive, Mini Monitor (Ref . 127),
- rodents monitoring using rodenticide bait suitably housed in the removable box for an easier cleaning and management.

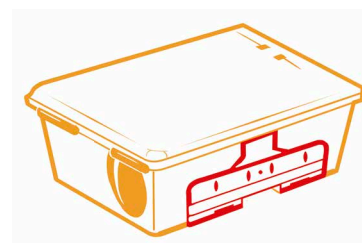

Moreover, removing the tray for the rodenticide, it is possible to house a glue cardboard to rats (Ref . 129) that covers the entire surface of the dispenser.

#### NEW METAL CLIP:

- + HANDY
- + VELOCITY
- + SECURITY

Smart fixing system

#### APPLICATION

Total Box is studied to create bait points protected from dust, dirt, moisture. Their design is compact and non-invasive.

This trap can be used for rodent control programs conforming to the integrated and HACCP fighting systems in internal areas (in case of handling and/or production of foods solely with the use of adhesives) and external areas in civil, industrial (food companies), home.

The meets the required characteristics of Ministerial Ordinance of 10 February 2012 (mandatory use of a work station with security key for the administration of rat poison bait).

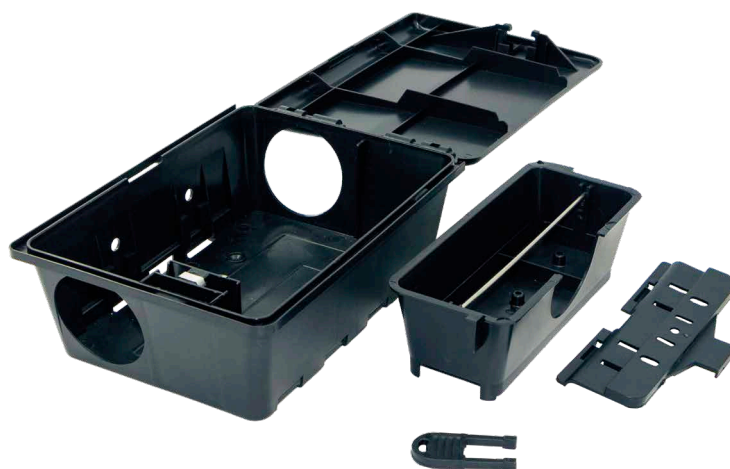

Diameter entry hole: 60 mm
